

圖8-2 玉山國家公園計畫圖

This map illustrates the management zones of Yushan National Park. The park's boundary is marked with a thick black line. The map is divided into several color-coded areas: a large yellow area for general management, green areas for ecological protection and special scenery, and red areas for historical site preservation and recreation. Key geographical features include major peaks like Jade Mountain (Yushan), East Peak, and South Peak, as well as other mountains such as Mt. Shide, Mt. Shuanghu, and Mt. Shuangfeng. The map also shows the surrounding region, including the town of Jisheng and the area around the park's entrance. A legend in the bottom right corner defines the symbols used for different management zones, roads, and the park boundary.
